

# *it's a dog's world*

## *Surviving Canine Adolescence with Helen Nicholls, CPDT-KA Sunday, October 18, 2020*

Canine adolescence is the most challenging period while raising a young dog. Adolescence can begin as early as four to eight months of age and can last up to three years!

***You can survive!***

Attend this seminar and gain advice on must-have obedience skills, management strategies and life skill exercises to help guide your adolescent dog into a well-mannered adult dog. Attend this seminar and gain valuable tips on:

- Creating polite meeting/greeting of people and other dogs
- Prevention of jumping on people
- Better leash walking skills
- Improved coming when called/recalls
- Eliminating counter surfing & stealing
- Reduction of negative chewing habits

### **Past Testimonials**

"Helen was excellent! She had a good sense of humor and was time efficient."

- Matty Y. owner of a Samoyed

"The facility was well designed and clean. Helen offered concrete advice for redirecting unwanted behaviors." - Joanne M. owner of a labradoodle

"The staff were welcoming, efficient and very helpful. Helen was outstanding! She was realistic, knowledgeable, fun and had excellent ideas."

- Donna C. owner of a Golden Retriever

### **Seminar Details**
